

About Us – Our History

Our company FICAP, founded in 1980, designs, manufactures, installs and services customised conveyor belts. Our individual solutions are designed for heavy duty usage in the railway industry, in sugar plants as well as in incinerator sites (transport of slag).

With our passenger conveyor belt FUNBELT®, we are applying our expert knowledge to the leisure industry. We offer ready-to-use products combining operational safety, performance, user friendliness and aesthetics.

Products Photos and Description

Our product FUNBELT® was specially designed for the conveyance of passengers. Both in summer and winter, FUNBELT® allows a comfortable connection between central points of your facility (accommodations, restaurants, car park, ski slopes,...) as well as an easier handling of the conveyance of passengers. Thanks to FUNBELT® skiing schools may easily transform an ordinary snowy hill into a slope.

Competitive Advantage:

Our innovative conveyor belt FUNBELT® combines aesthetic and technical performance. We customise any of our conveyor belts to your individual needs and thus guarantee a sturdy and user-friendly product.

Our Company's Philosophy

Expert for Conveyor Belts.
