

CONTACTS: eXpression holds

Simon RAVAZ s.ravaz@expression-holds.com

Created in 2003, eXpression holds design, manufacture and sell a range of over 700 different climbing holds. From the beginning, our goal has been to offer a different kind of hold (in terms of shape and colour) with continuous major innovations; notably the first asymmetrical climbing board (one of our best sellers!).

All of our products are created by passionate climbers along with professional climbers from our team, having 4 new pro-model sets released this year –We are also continually improving our production and manufacturing techniques in order to maintain and provide you with the highest quality product that is still manufactured in France!
